

Product- information Type: IK553

Group: Insulating and mounting accessories

Insulating caps made of siliconerubber

Area of application (Cases):	TO218(TOP3)
Thickness:	0.3 mm
Material:	Siliconerubber
Thermal resistance:	1.5 K/W
Temperature rating:	180 °C
Dielectric strength:	10 KV

Insulating caps in highly heat conductivity silicone rubber makes the isolated mounting of semiconductors very simple e.g. to heatsinks.

Specially suitable for economical clip mounting.

- Dielectric strength: ca. 10 KV
- Dielectric constant: 4,4 (by 106 Hz)
- Hardness: 75 Shore A
- Elongation: 100 %
- Flammability: UL 94 VO

Thermal resistances Rth (K/W) without Thermal compound.
